Skills & Technologies

- **Programming Languages:**
 - Proficient in C# for game development, ensuring dynamic and engaging gameplay experiences.
- **Game Development Framework:**
 - Expertise in Unity for designing and developing a diverse range of games, specializing in hyper-casual genres.
- **Project Management and Version Control:**
 - Adept in utilizing GitHub for seamless collaboration, version control, and efficient project management.
- **Backend Integration:**
 - Hands-on experience with Firebase, enhancing player engagement through robust backend functionalities.
- **Game Genres:**
 - Specialization in hyper-casual games with a portfolio featuring puzzles, sorting games, runners, and arcade idle games.
- **Problem Solving:**
 - Strong analytical and problem-solving skills contributing to the successful resolution of challenges in game development.
- **Creativity:**
 - Keen eye for detail and creative flair, ensuring the delivery of engaging and innovative gaming experiences.

PORTFOLIO

PROJECTS

Scavenger Hunt

Genre: Puzzle / Hyper-casual

Description: Designed and executed an immersive hidden object game, featuring intricate scenes and challenging quests. Leveraged Unity's 2D and 3D capabilities to create visually stunning environments, and incorporated interactive elements to enhance gameplay engagement.

Tap It Away

Genre: Puzzle / Hyper-casual

Description: Conceptualized and developed a series of mind-bending puzzle games with unique mechanics and intriguing challenges. Leveraged Unity's physics engine to create realistic interactions and visually appealing effects.

PORTFOLIO

Cake Sort

Genre: Puzzle / Hyper-casual

Description: Designed and programmed a dynamic sorting game that challenges players' logic and reflexes. Created a variety of sorting scenarios with increasing complexity, providing an entertaining and intellectually stimulating gameplay experience.

Doll Dressup

Genre: Dressup / Hyper-casual

Description: exciting game designed for creative minds, where players embark on a journey to craft their unique dolls. With a myriad of customization options, from hairstyles and outfits to accessories and backgrounds, the game offers a delightful experience for users to express their creativity.

PORTFOLIO

Battery Run

Genre: Runner / Hyper-casual

Description: Crafted an endless runner game set in a galactic environment. Engineered fluid and responsive controls, seamless obstacle generation, and a progressive difficulty curve to keep players engaged and immersed.

explore these projects further in my portfolio, gaining insight into the meticulous design considerations, technical implementations, and creative solutions that contribute to the success of each Project.
